

## 2012 Outdoor Socially Distant Flu Clinic Guidelines

We are doing things a little different this year because of the pandemic.

- The clinic will be held outdoors in our parking lot.
- Visits will be by appointment only, so please call to schedule
- All parents and patients over 2 years old must be masked and remain distanced from other families. There will be demarcated lines, and staff to instruct you where to go.
- The clinic staff will only be administering flu vaccines. No other vaccines will be administered at the clinic.
- There will not be a doctor at the clinic to evaluate your child. If you are concerned that your child may not be healthy enough to receive a vaccination, please cancel your appointment and you will be able to reschedule.
- Along these lines, all children must be fever free for at least 48 hours to be seen.
- You will be able to get your child's updated vaccination record via the patient portal later in the day.
- While we will have cones and staff helping to keep the parking lot ordered, we urge parents to pay extra care to their children, as there are other offices in the building that will be conducting business, and cars other than those of our families.

Feel free to call the office with any questions.
